

Innovation

Santa Rosa Systems is providing innovation to the material handling industry through all aspects of our business.

- **Quality**
At SRS Quality is not a job, but a culture, which is based on efficiency, accountability and the understanding that the customer comes first.
- **Engineering**
Engineering is a key discriminator for SRS. With over 150 years of combined experience in the material handling industry, our knowledge extends beyond the machine design, into the applications and operations of our customers. If our standard equipment doesn't meet your needs, SRS can tailor a design for your operations.
- **Manufacturing**
SRS Equipment is designed and manufactured for the most severe unit handling applications. Our heavy duty designs and construction produce the most reliable equipment in the industry.
- **After Sales & Service**
The SRS After Sales & Service team is comprised of knowledgeable professionals who are available 24/7 to support your operation. Our technicians are cross-trained in SRS manufacturing operations in order to gain an intimate working knowledge of the equipment. SRS technicians are available to travel to your facility should any unexpected issues arise.

Telescopic Gravity Loaders & Unloaders

Model 9071- Shown with elevated docking station.

Features & Benefits

- Low cost solution for loading and unloading flat floor trailers.
- Manually deployed and infinitely adjustable up to the maximum length.
- Docking station provides convenient storage and includes integral dock transition ramp.
- Model 8589 is equipped with swivel casters and the package stop converts into a roller transfer so that this model can be used for **LOADING** and **UNLOADING**.

Specifications

Lengths

Refer to adjacent dimension chart.

Load Capacity

50 lbs/linear ft

Rollers

Dia. 1.9" PVC Rollers w/ UV inhibitors & modifiers for impact resistance.

Frames

Extruded aluminum w/ welded steel supports

Docking Stations

Available in static (anchored) or mobile (caster wheel) configurations and elevations from 0' to 4'-0". Docking stations include integral dock transition ramps.

Warranty

1-year factory warranty

| Model No. | Number of Stages | Between Frame Width | Retracted Length | Extended Length |
|-----------|------------------|---------------------|------------------|-----------------|
| SRGL-9048 | 6 | 32 in. | 7'-0" | 30'-0" |
| SRGL-9071 | 6 | 32 in. | 9'-1 1/2" | 43'-1" |
| SRGL-8006 | 5 | 24 in. | 11'-8" | 48'-0" |
| SRGL-8589 | 5 | 24 in. | 11'-8" | 48'-0" |

Model 9048- Mechanized docking station utilizes the minimal amount of floor space by storing the unit in the vertical position. The design was developed to preserve egress in the loading area.
